PREPARATION

complete before the practicum

1. *What theories, laws, and/or formulas are most important for this experiment?*
2. *What do you expect to learn?*
3. *What do you expect to observe, and why?*

BUILD AND INVESTIGATE

Tasks A1, A2, I1 to I5. This manual has no simulate task.

Pull configuration

Tasks A1, A2 and I1

Configuration	Pin, not pressed predicted	Pin, pressed predicted	Pin, not pressed measured	Pin, pressed measured
Pull-up				
Pull-down				

Which way round did the LED have to go before it lit, and how did you know?

Game features

Tick what your game does, and name the pins you used.

- ☐ LED lights on a button press — Input pin(s):
- ☐ Moles appear in a random hole — Output pin(s):
- ☐ Score counts a successful hit — Reaction time measured:
- ☐ Game ends after a set time — Rounds per game:

Troubleshooting log

Task C2. This table is the point of the manual, so fill it as you go, not afterwards.

Symptom you saw	Cause you found	What fixed it

C1 Pull configuration and LEDs *How must an LED be connected to light? What does a pin read when the button is not pressed, pull-up and pull-down? Why is the resistor necessary? If the LED lights on release rather than press, what does that tell you?*

REFLECTION

complete before submission

1. *Which results matched or differed from your expectations, and why?*
2. *What is the most important thing you learned?*
3. *What would you do differently next time?*

TA check-off: Date:
